An aerial, hazy view of London, England, showing a dense urban landscape. The London Eye is prominent on the left side. The text is overlaid in the center of the image.

9,500 deaths per year in London due to air pollution

King's College London

A photograph of a modern living room. On the left, a fireplace with a stone surround has a fire burning. Above it, a large flat-screen TV is mounted on a light green wall. To the right, a brown armchair sits next to a small round table with a lamp. In the foreground, a large green sofa is partially visible with a red blanket. In the background, a dining table with chairs is set up in an open-plan area. The room has light green walls, a white ceiling with recessed lights, and a patterned rug on the floor.

90% of our time is
spent indoors

Indoor air is typically 2-5 times more contaminated than the air outdoors

VOCs

PM2.5

VOCs

- Cleaning agents
- Mattresses
- Fuels
- Cooking products
- Beauty products
- Viruses
- And more...

Allergens

Mold

Pet Dander

Dust

VOCs

Smoke

Bacteria

**“Indoor air pollution is one of the
greatest threats to human life”**
